

Product brochure

The concept [Upload/create ➡ approve ➡ sign ➡ monitor]

2Agree is a contract management system to easily upload or create (using track changes) contracts, approve and electronically sign contracts and after that to manage and monitor these contracts during the contract life cycle. By doing so you will be able to reduce costs and risks.

The added value !

- no unplanned automatic contract renewals
- a complete overview of all agreements
- enough time to benchmark alternatives
- reduce risks
- generating savings and/or prevent cost increases
- handover of agreements in case of illness or when an employee leaves the company
- intelligent and effective cooperation between colleagues
- professional behaviour towards the contract party
- low cost
- high compliancy
- we can import all your current contracts and documents → 2Agree

The technical solution

- web based
- access via HTTPs and SSL
- certified datacentre
- no installation or IT services needed
- Single Sign On
- 2 Factor Authentication
- certified digital signature
- very fast response time (user experience)
- access via pc, laptop and tablet
- automatic updates

Pricing

User type	Number of users	Price per user per month	Number of contracts	Number of documents
User	2	€ 35,00	Unlimited	Unlimited
	3-5	€ 20,00		
	6-10	€ 15,00		
	11-25	€ 12,00		
	26-50	€ 10,00		
Viewer	1	€ 2,50		
Per Sign Request		€ 0,60		

Excl. VAT

The features

Agreements

Upload or create (using track changes) agreement documents

After logging in a full overview of all agreements

Standard view is the deadline view (end date -/- notice period)

Sorting can be easily adjusted, an extensive search / filter function is available

Tasks

Automatic end date -/- notice period task for every new agreement

Create tasks, assign them to users and monitor progress

All tasks presented in a clear overview

Email notifications

Email notifications are sent via email to the users

Interactive (click through) Dashboard

Graphical view of all agreements (total and value)

Graphical view of all tasks

Profiles

Flexible and future proof authorisation by using profiles setup
A user can be assigned to 1 or multiple profiles
Per agreement 1 or multiple profiles can be selected

Dropdown lists

Almost all information can be maintained in data tables which are accessible via dropdown lists when adding or modifying agreements (easier, quicker and less data pollution in the system).

KPI's

Creating and managing standard KPI's (Key Performance Indicators)
Per agreement managing a target value, period and achieved value

Additional contract fields and templates

Besides the general contract fields it is also possible to create and use additional contract meta data fields (text, date, value, dropdown-list etc.) which are specific for your organization. It is also possible to create templates to organize which contract fields are used/shown.

Documents / attachments / hyperlinks

Per agreement a wide range of document types can be uploaded in to 2Agree or (hyper)linked to your local or cloud storage (e.g. Sharepoint or Google Drive). Besides uploading a document, you can also select a document from your document templates library, in order to create (using track changes) an agreement document.

Approval workflow

Creating and managing approval workflows per agreement
Report progress, archive approvals

Digital signature

Documents can be sent to 1 or multiple recipients for digital signature.
After completing the process a signed document and certificate will be available in the 2Agree documents overview.

Chat

The chat function offers the functionality to chat about subjects related to the agreement. Chat messages are supported by email notification and will be sent to the users being part of the chat.

Languages

English, Spanish, French, German, Danish, Dutch and Chinese
User screens, help instructions and email alerts
Every user can use the system in his/her own language

Help

A very detailed user manual in 2Agree
Contact the helpdesk via email or phone
Multiple instruction tutorials in 2Agree

Start using 2Agree

It's very easy to start-up 2Agree
As 2Agree is a cloud solution a software installation is not required and using the configuration manual will result in a very fast start-up

Data migration to 2Agree

2Agree offers a service to migrate your actual contract information from Excel and/or another data source to 2Agree. This will result in an easy and efficient start using 2Agree.

Why 2Agree?

Organized

- controlling and monitoring agreements
- efficient, effective, secured, planned and consistent

Full control

- evaluate the current situation / agreement
- define future requirements
- benchmark alternatives

Reduce risks

- no more automatic renewals or missing important milestones
- smart authorisation who can see and do what

Prevent cost increases and/or realize savings

- pro-active behaviour towards the external contract party
- enough time to benchmark and negotiate alternatives
